EDUCATION NUMBER.

NEW YORK, THURSDAY, AUGUST 3, 1893.

CONCERNING THE SELECTION AND SUPPLY OF SCHOOL BOOKS

We would respectfully draw attention to the following important facts and reasons why you should purchase school books required for your School of the American Book Company:

FIRST: It was the purpose of the Company at its formation to furnish books to schools at lower prices than had ever been done before. That purpose has been carried out. Our prices are very low, **considerably lower** on the average than those of **other publishers.**

SECOND: When for any reason single copies of our books may be desired, we deliver them, transportation **charges prepaid,** to any school-board or to any individual on receipt of **wholesale prices**; other publishers add about 15 per cent. to their list prices to cover postage, making what they call a "mailing price."

THIRD: Our text-books are now in most general use throughout the United States. This is the **best possible proof of their superiority.** They are instances of the "survival of the fittest." Books which have proven the **best adapted** to the **needs of the schools** have come, in the course of years, into most general use.

FOURTH: We publish by far the **largest list** of school books to **select from.** No matter what the peculiar needs of your school may be, **you** can find the books exactly suited to it on our list.

For example, we do not offer you a single series of readers, and tell you these are "the best," since different schools and different localities demand different books. We have, at least, **five admirable series** of **readers, all popular, all widely used,** and **all excellent.** One of these five is sure to suit you.

If **supplementary readers** are desired our list is equally copious. With us your choice is not limited to a single series; we offer **sixty or more volumes** specially arranged for this purpose; some devoted to History, some to Biography, some to Natural History and kindred subjects, others literary in their character, but all providing excellent and abundant supplementary reading at the **lowest possible prices.**

It is the **same with arithmetics.** We have several strong series, each specially adapted to the requirements of certain schools.

What is true of readers and arithmetics is equally true of geographies, spellers, copy-books, grammars, and language books; and, in fact, of all the branches pursued in public and private schools of every grade.

FIFTH: In a word, the American Book Company were **pioneers in low prices** and hence are deserving of your support; they have the **largest list of books,** the books which **suit the people** best, and hence are most largely used; they have the **cheapest books.** On these grounds they ask your patronage.

You can purchase from the American Book Company **every book you need in every branch of study.** If you do this you will **save** yourself **trouble in ordering,** in **keeping accounts,** and in **making settlements.** But more than all these, you will get the **best books at the lowest prices.**
